

Panels

Bekafor Prestige is an exclusive and decorative panel fence system that protects the house and garden in a perfect way. Bekafor Prestige is an excellent alternative for wrought iron.

Bekafor® Prestige

BENEFITS

Decorative

Bekafor Prestige is the decorative panel fence system for residential surroundings: an exclusive design with very high aesthetic qualities. Because of its unique and innovative steel bows, Bekafor Prestige is an excellent alternative for wrought iron but totally maintenance free.

Easy installation

Bekafor Prestige is very easy to install as it makes use of the existing posts and accessories of Bekafor Classic.

A solution for all situations

The different panel heights and a range of matching posts, collets, accessories (floor plates, corner clips and wall fixators) and gates offer a solution for all situations. The system can even be installed on a wall or concrete floor.

Applications

Bekafor Prestige is highly recommended for fencing of residential surroundings.

Panel

Bekafor Prestige is a rigid welded panel, made of galvanised low-carbon steel wire. The panel is polyester-coated afterwards.

The double, horizontal wire makes the panel extra strong and long lasting.

Mesh sizes are: 200 x 65 mm

Wire diameters: 5 mm

Posts and fixation

Bekafor Prestige panels can be installed with metal Bekaclick posts, (diam 48 mm, plate thickness 1,50 mm). The panels can be easily fixed to the posts by making use of the special Bekafor collets.

Accessories

Several accessories are available for:

- fixing a panel directly to a wall (wall fixators)
- installing posts on a concrete floor or wall (base plates)
- installing panels in an angle (corner clips)

Gates

The Bekafor Prestige system is totally finished and safely equipped with the Bekafor Prestige single gates.

Coating technique

Panels made out of galvanised wires. An adhesion coating is given for a perfect adhesion with the polyester coating (min. 100 micron).

The posts are in- and outside galvanised (min. coating 275g/m², both sides together), in accordance with Euro norm 10326. Afterwards an adhesion coating is applied and finally the posts are plastic coated (min. 60 micron).

Colours

Green RAL 6005 - Anthracite
