

Access control

The Fortinet swing gates harmonise perfectly with the different fences on rolls: Pantanet, Fortinet, Plasitor.

Fortinet® swing gates

Benefits

Very strong construction

All elements of the Fortinet swing gates have a very strong construction: frame, gate infill, posts, hinges and lock system.

Good design

All gates are meticulously finished: joints are fully welded and mitred and finished with elegant Fortinet mesh infill. Fortinet gates integrate with the best designs.

Quality coating

Fortinet gates receive the best anti-corrosion coating that currently exists on the market: the gates first receive a protective coating. On top of this comes a polyester coating that satisfies the highest norms in the field of gloss, hardness and adhesion.

Fast installation

Fortinet gates are designed for a fast installation, with accessories limited to a minimum.

Applications

Fortinet swing gates are the ideal solution for fences where rigidity and design are important: garden and courtyard, parks, tennis courts...

Frame

The gate frame is made out of square steel tube with a profile of 40 x 40 mm. With Betafence-brand plate.

Mesh infill frame

Fortinet mesh with square mesh of 50 x 50 mm is welded into the gate frame. The horizontal wires have a crimp at every mesh.

Posts

They are adapted to the different heights of fences and completed with a plastic cap.

Coating technique

Double organic coating: KTL and polyester.

Colours

Fortinet gates are available in green RAL 6005 and some types in black RAL 9005.

Accessories

Fortinet gates have a cylinder lock integrated in the frame.

The gates are provided with adjustable hinges for a perfect adjustment.

A gate catcher is available separately.

The double gates are provided with a ground bolt and ground plate.

Lock slot, bolt guider and handle are made of plastic.

Front plate and bolts are rustproof.

For double gates 3000x1750/1950 mm and 4000 x 1750/1950 mm a professional lock and groundboltsystem is foreseen.

Front plate and bolts are rustproof.
